## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Cook.

Lee et al. teach a method for detecting fraud when facilitating a payment transaction over the Internet, the method comprises receiving sales information pertaining to the purchase of a product (121), receiving payment information from a buyer (304), performing an automated analysis (112) to determine if fraud exists, notifying the seller to send the product to the buyer (the fulfillment of the order) when no fraud exists and communicate to a human for fraud investigation when the analysis indicates potential fraud (104 and claim 7). It should also be noted that Lee et al. teach numerous fields including IP address, shipping address, billing address (Table 2) that are used in the automated analysis to determine fraud. Although Lee et al. teaches the fraud processing of the instant application, Lee et al. are silent as to the detection operation be conducted by the payment facilitator system.

However, is a well known business practice that fraud detection and credit verification is performed by the payment facilitator system at a point of sale device, such as disclosed by Cook. Specifically, Cook teaches a centralized authorization a fraud prevention system having a payment facilitator or payment intermediary. Accordingly, to provide the fraud detection at a payment facilitator system, as disclosed by Cook, in

the system of Lee et al. would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for this change would have provided a consistent set of rules for fraud detection for multiple merchants.

Regarding claims 18 and 39, As noted above, Lee et al. teach all of the features of the claimed invention including sending communication to the seller; however, Lee et al. appears to be silent regarding sending communication to the purchaser. On the other hand, it is common for businesses to notify the purchasers that a transaction can not be completed due to processing flags which include overdrawn of an account, invalid or expired credit card number etc. Accordingly, it is believed that Lee et al teach sending a communication to the buyer. In order to specifically define such a teaching, Anderson et al. is submitted to show contacting a customer in the event of a problem (Fig. 3). Accordingly, to include a communication to the buyer in the event of a problem with the transaction in the Lee et al. system, as suggested by Anderson et al. would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for such a modification is seen in col. 5, lines 40-50 which details how customer relations are improved.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
